ZONE DELIVERIES

ZONE 1 delivered prices are for truckloads delivered by us within the distances of Wichita Falls, Brownwood, Austin, Galveston, Port Arthur, Lake Charles, Baton Rouge, Monroe, La., and Eldorado, Ark.

ZONE 2 delivered prices are for truckloads delivered by us outside of Zone 1 as far as Abilene, San Angelo, San Antonio, Corpus Christi, New Orleans, La., Vicksburg, Miss., Little Rock and Fort Smith, Ark., Tulsa and Oklahoma City, Okla.

When several truckload orders to a city within either zone can be combined into a minimum carload we reserve the privilege to ship that way, the customer to unload from car. This will assure fresher looking plants and quicker delivery during rush periods.

CARLOADS may be shipped within Texas at a saving over truck delivery on a special low balled and burlapped rate of 20% of the first class rate on a 30,000 pound minimum; and on 25% of the first class rate on an 18,000 pound minimum. To states surrounding Texas, 32½% of first class rate on 16,000 pound minimum. Cars may be stopped enroute three times for partial unloading at $6.93 for each stop.

Scottsville is in Harrison County, Northeast Texas, where nursery stock, along with natural plant life, becomes dormant in October, goes through normal winter temperatures of 20 degrees above zero and does not break into spring growth until late February or early March, thus producing hard, fully dormant nursery stock which ships safely anywhere.

Our nursery stock and roses are grown on moderately rich, firm, but porous soil which permits the ball of earth to readily unite with the soil into which it may be planted. All of the balls are flat bottomed and uniform in dimensions according to the size of the plant. They are suitable for planting where irrigation is required. These are valuable factors.

Apply Zone 1 prices for purchases at nursery of 50 plants or less.
